Coffral Aerial Platforms

The 3rd leg of our vision to position Coffral as one-stop access solution provider for working at height is the Aerial Platforms. To keep a high-level standard in line with our other product lines, we carry JLG only as our preferred brand 'The Mercedes of Aerial Platforms.

Coffral Aerial Platforms Overview

Types of Lifting Equipment:

Lifting of People, also known as Manlifts, which include:
Boom Lifts, Scissor Lifts, and Vertical Mast Lifts.

Boom Lifts

Ideal for reaching difficult workspaces, areas that require maximum horizontal and vertical reach.

Scissor Lifts

Ideal for indoor projects, more so if the project requires up-and-down mobility. Lightweight and easy-to-move equipment that allows higher load capacity and platform extension.

Vertical Mast Lifts

Ideal for operating in narrow aisles and congested environments. These easy-to-use lift platforms offer a combination of high lift, reach, and maneuverability that makes them a safe solution for tough overhead maintenance applications.
